# Preface

This PhD thesis, entitled ‘Unemployment, health, and well-being’, presents sociological analyses on the links between employment status, health, and well-being, and experiences of not being employed. The PhD project was funded by SFI - The Danish National Centre for Social Research; the Employment and Integration Administration, City of Copenhagen; the Department of Sociology, University of Copenhagen; and the Danish Ministry of Employment.

While completing the thesis, I had the pleasure of working from offices in two research institutions and one administrative entity in Denmark and two overseas research institutions. I conducted most of the work whilst at the Department of Employment and Social Inclusion at SFI - The Danish National Centre for Social Research, Copenhagen, Denmark. I also worked from the Department of Sociology at University of Copenhagen, Copenhagen, Denmark and the Employment and Integration Administration at City of Copenhagen, Copenhagen, Denmark. During the Fall semester of 2014, I was a visiting student researcher at the School of Social Welfare, University of California at Berkeley, Berkeley, United States of America. I was also a visiting student researcher at the School of Public Health and Social Welfare, Queensland University of Technology, Brisbane, Australia, for the month of October 2015. I extend my gratitude to my colleagues at these five institutions for offering useful insights in to social research on unemployment, health, and well-being.

I wish to thank my PhD supervisor, Peter Abrahamson, for fruitful discussions on, amongst other topics, the framework, themes, and the sociological contributions of the thesis. I also wish to thank the co-supervisor on my PhD project, Anders Holm, for productive discussions on analytical approaches, data, and appropriate journals. Additionally, I owe thanks to my research article co-authors, Matias B. Grynderup, Åse M. Hansen, Anders Holm, Linda Kaerlev, Kjetil G. Lundberg, and Annemette C. Svane-Petersen, for sociologically inspiring discussions.

I wish to thank the session chairs and participants of my presentations at the following events for providing beneficial feedback: the 11<sup>th</sup> European Sociological Association Conference, 2013, Turin, Italy; the Danish Sociological Conference, 2014, Copenhagen, Denmark; the 18<sup>th</sup> International Sociological Association World Congress of Sociology, 2014, Yokohama, Japan; the 27<sup>th</sup> Nordic Sociological Association Conference, 2014, Lund, Sweden; the Australian Social Policy Conference, 2015, Sydney, Australia; and the SFI Advisory Research Board Conference, 2016, Copenhagen, Denmark. I also wish to thank the participants and lecturers of e.g. seminars, courses, article discussion meetings, research group meetings, and workshops
