AT THE JUNCTION OF PROJECT LEADERSHIP AND INNOVATION

Roskilde
University
Press

This book contains the final results from the Fifth Danish Project Management Research Conference (DAPMARC 5), held in Copenhagen in May 2019. Authors presented their papers at the conference in the so-called 'research track'. About 60 practicing project managers gave feedback to the presentations and participated in lively discussions of the papers.

In the fall of 2019 we then asked the presenters to update the papers taking into account all the comments they had received. We also asked the authors to up the academic standard to "journal quality" and we organized a reviewing process.

Six papers ended up in the book. Hence, six set of authors took up our challenge of increasing the quality and coping with all the issues that were raised at DAPMARC 5. As editors of the book – and co-organisers of the DAPMARC conference – we are really proud to present this book with six chapters of high quality addressing issues *at the junction of project leadership and innovation*.

Finally, we would like to thank the Otto Mønsted Foundation and Dansk Projektledelse for making this book possible.

At the junction of project leadership and innovation
